
Welcome

Soumis par christophe - 2006/12/02 20:30

You can use this forum to discuss about WebOffice, my fork of popper/popawid. I'm near to publish this after a long work. You can speak here in English or in French. Sorry for english speaking visitors, but my site is in French, as i'm so bad in English.

If it becomes too complicated, i will create specialised forums for purposes and languages.

Welcome.

You can test-it with the left link: "webmail"

Login: test

pass: test

And be nice : click on some Google link to help me in getting some money to continue my work.

Christophe.
